

Project ImPACT

Project ImPACT is an evidence-based coaching program for parents/caregivers of young children with autism spectrum disorder (ASD) and related social communication delays.

Through group based instructional sessions and hands on individual training sessions, parents/caregivers will learn strategies to help their child develop social, communication, imitation, and play skills during daily routines and activities.

This program will be delivered virtually, using an online platform, on a weekly basis to parents/caregivers, with the child present for the individual coaching sessions.

Please speak to us if you require assistance with technology.
